International Journal of
SATELLITE COMMUNICATIONS (*Int. J. Satell. Commun.*)

CONTENTS

VOLUME 12, ISSUE Nos 1–6

ISSUE No. 1 January–February

Special Issue on Personal Communications via Satellite
Guest Editor: Gérard Maral

Introducing our Guest Editor—Professor Gérard Maral: B. G. Evans 1

The Ways to Personal Communications via Satellite: G. Maral 3

Assessment of a Public Mobile Satellite System Compatible with the GSM Cellular Network: F. Delli Priscoli and F. Muratore 13

Performance Analysis of a Dynamic Channel Allocation Technique for Satellite Mobile Cellular Networks: E. Del Re, R. Fantacci and G. Giambene 25

Architecture and Networking Issues in Satellite Systems for Personal Communications: F. Ananasso and M. Carosi 33

The Calling[SM] Network: a Global Wireless Communication System: E. F. Tuck, D. P. Patterson, J. R. Stuart and M. H. Lawrence 45

The STARSYS Data Messaging and Geo-positioning System: A. Kaveeshwar 63

Integrated Global Networks, Tomorrow's Communications Today: J. P. Castro 71

Influences of External Digital Environment, Markets and Terminal Price Elasticity on Personal Satellite Systems: W. T. Brandon 77

Analysis of Basic System Parameters of Communication Networks based on Low Earth Orbit Satellites: A. Böttcher, A. Jahn, E. Lutz and M. Werner 85

Interference between Satellite Systems in Non-geostationary Orbits: R. A. Nelson and W. L. Pritchard 95

A Model for Interference Studies Relating to Multisatellite Non-geostationary Systems in the Mobile Satellite Service: J. Pahl, J. Parker and K. Singarajah 107

Network and Common Channel Signalling Aspects of Dynamic Satellite Constellations: C. Cullen, X. Benedicto, R. Tafazolli and B. Evans 125

ISSUE No. 2 March–April

The Optical Crossbar Switch for Signal Routeing On Board Communication Satellites: G. C. Baister, P. V. Gatenby, N. Aldridge, C. Stace and H. White 135

An Advanced Satellite Communication System witn On-board Fast Packet Switching Capabilities: E. Del Re and R. Fantacci 147

Precision Waveform Shaping and Precompensation for High Data Rate Space Communications Systems: J. A. Tague and L. M. Shimoda 157

Transmission Quality of Group III Facsimile on IDR Satellite Links with Circuit Multiplication Equipment: M. H. Sherif, E. Cuevas, T. Liebert and S. Dimolitsas 167

Implementation of Adaptive Modulations as a Fade Countermeasure: M. Filip and E. Vilar 181

Abstracted/indexed by Cambridge Scientific Abstracts, Current Contents/ Eng, Tech & Applied Sciences, Engineering Index, Information Reports & Bibliographies, INSPEC, Research Alert (ISI), SCISEARCH Databases (ISI) and Telecommunications Abstracts

ISSUE No. 3 May–June

Special Issue on Satellite Networking
Guest Editor: Prakash Chitre

Introducing our Guest Editor—Dr Dattakumar Chitre: B. G. Evans 193

Introduction: D. M. Chitre 195

An Architecture Design Approach for Large Satellite Networks: C. Cotner and T. Inukai 197

Asynchronous Transfer Mode (ATM) Operation via Satellite: Issues, Challenges and Resolutions: D. M. Chitre, D. S. Gokhale, T. Henderson, J. L. Lunsford and N. Mathews 211

Broadband Island Interconnection via Satellite—Performance Analysis for the RACE II—CATALYST Project: M. H. Hadjitheodosiou, P. Komisarczuk, F. Coakley, B. G. Evans and C. Smythe 223

Carriage of SDH over Satellite Systems: A. Strange, S. L. Arambepola, A. J. Flavin, A. Stevenson and P. T. Thompson 239

An Adaptive Resource Sharing Strategy for TDMA: D. von Hugo and A. Wilde 249

Technical Issues Regarding Satellite Packet Switching: W. D. Ivancic, P. Chu and D.-J. Shyy 257

Services and Supporting Architecture of the ESA OBP Architecture: B. Barani and H. J. Tork 269

Performance of a Prioritized On-board Baseband Switch for a Multiservice Multibeam Satellite: S. Bohm, A. K. Elhakeem, K. M. S. Murthy and M. Hachicha 283

Analysis of a Movable Boundary Access Technique for a Multiservice Multibeam Satellite System: S. Bohm, A. K. Elhakeem, K. M. S. Murthy, H. Hachicha and M. Kadoch 299

Hybrid Satellite and Terrestrial Networks: D. M. Chitre, D.-J. Shyy, A. Ephremides and S. Gupta 313

Calls for Papers 329

ISSUE No. 4 July–August

On the Performance and Complexity of a Generalized Minimum Distance Reed–Solomon Decoding Algorithm: R. E. Peile 333

Voice Transmission Quality of Mobile Satellite Communications Systems: S. Dimolitsas, F. L. Corcoran and C. Ravishankar 361

The BMLA/LS Technique and its Application in a Mobile Satellite Communication Channel: Y.-S. Liu 369

Offset Fresnel Zone Plate Antennas: Y. J. Guo and S. K. Barton 381

A New Method for the Prediction of Fade Duration Statistics in Satellite Links above 10 GHz: A. Paraboni and C. Riva 387

Broadcasting by Satellites: G. M. Drury 395

ISSUE No. 5 September–October

Special Issue on Navigation and Positioning
Guest Editor: Walter Blanchard

Introducing our Guest Editor—Walter F. Blanchard: B. G. Evans 419

Introduction to Satellite Navigation: W. F. Blanchard 421

Space Flight Tests of Attitude Determination Using GPS: C. E. Cohen, E. G. Lightsey, B. W. Parkinson and W. A. Feess 427

Effect of Broadcast and Precise Ephemerides on Estimates of the Frequency Stability of GPS Navstar Clocks: T. B. McCaskill, W. G. Reid, J. A. Buisson and H. E. Warren 435

Integrated GPS/GLONASS Navigation: Algorithms and Results: P. Raby and P. Daly 443

Performance of the GLONASS P-code at L1 and L2 Frequencies: S. Riley and P. Daly 453

Accuracies of Atmospheric Profiles Obtained from GPS Occultations: K. R. Hardy, G. A. Hajj and E. R. Kursinski 463

Results and Performance of Multi-site Reference Station Differential GPS: G. T. Johnston 475

On-the-fly Carrier Phase Ambiguity Resolution for Precise Aircraft Landing: H. Blomenhofer, G. W. Hein and D. Walsh 489

GPS Synchronized Power System Phase Angle Measurements: R. E. Wilson and P. S. Sterlina 499

ISSUE No. 6 November–December

Performance of LAMS-DLC: a Protocol for Low Altitude Satellite Networks: C. Ward, C. H. Choi and T. F. Hain 507

A Comparative Study of Solar Interference on the Iridium and MSS Constellations: C. Ward, T. Chang, T. M. Phillips and P. R. Acuff 525

A Multi-D Trellis Decoder for a 155 Mb/s Concatenated Codec: S. S. Pietrobon, J. J. Kasparian and P. K. Gray 539

On-board Closed-loop Congestion Control for Satellite-based Packet-switching Networks: P. P. Chu, W. D. Ivancic and H. Kim 555

A Data Courier Satellite System Concept: W. Brandon 569

Investigation of Signal Variance, Bit Error Rates and Pulse Dispersion for DSPN Signalling in a Mobile Dense Scatterer Ray Tracing Model: F. Amoroso 579
